FRONTLINE Plus is approved for use on all cats, including:

- Breeding, pregnant, and lactating queens
- Kittens as young as 8 weeks and weighing at least 1.5 lbs.

One spot application is all that's needed:

FRONTLINE Plus spreads from the single point of application, rapidly covering the entire cat and localizing in the hair, on the surface of the skin and in the sebaceous glands. These glands act as a reservoir, continuously replenishing FRONTLINE Plus onto the skin and hair coat, so it keeps working even if the cat gets wet.

Fleas, ticks, and chewing lice are killed quickly after coming into contact with a treated cat. Fleas and ticks do not need to bite the cat in order to die.
